# Image: Home Page

Description: The homepage of our 'Adopt-a-Companion Society' website. The theme of our non-profit organization is an animal shelter. Non-logged in users have the taskbar options on the left: 'Home', 'Calendar', 'Profile', and 'Notifications'. They can view the calendar, but when they click on 'Profile' or 'Notifications', they will be directed to log in first. The 'Profile' taskbar option has a dropdown menu that only shows 'Log In' for non-logged in users.
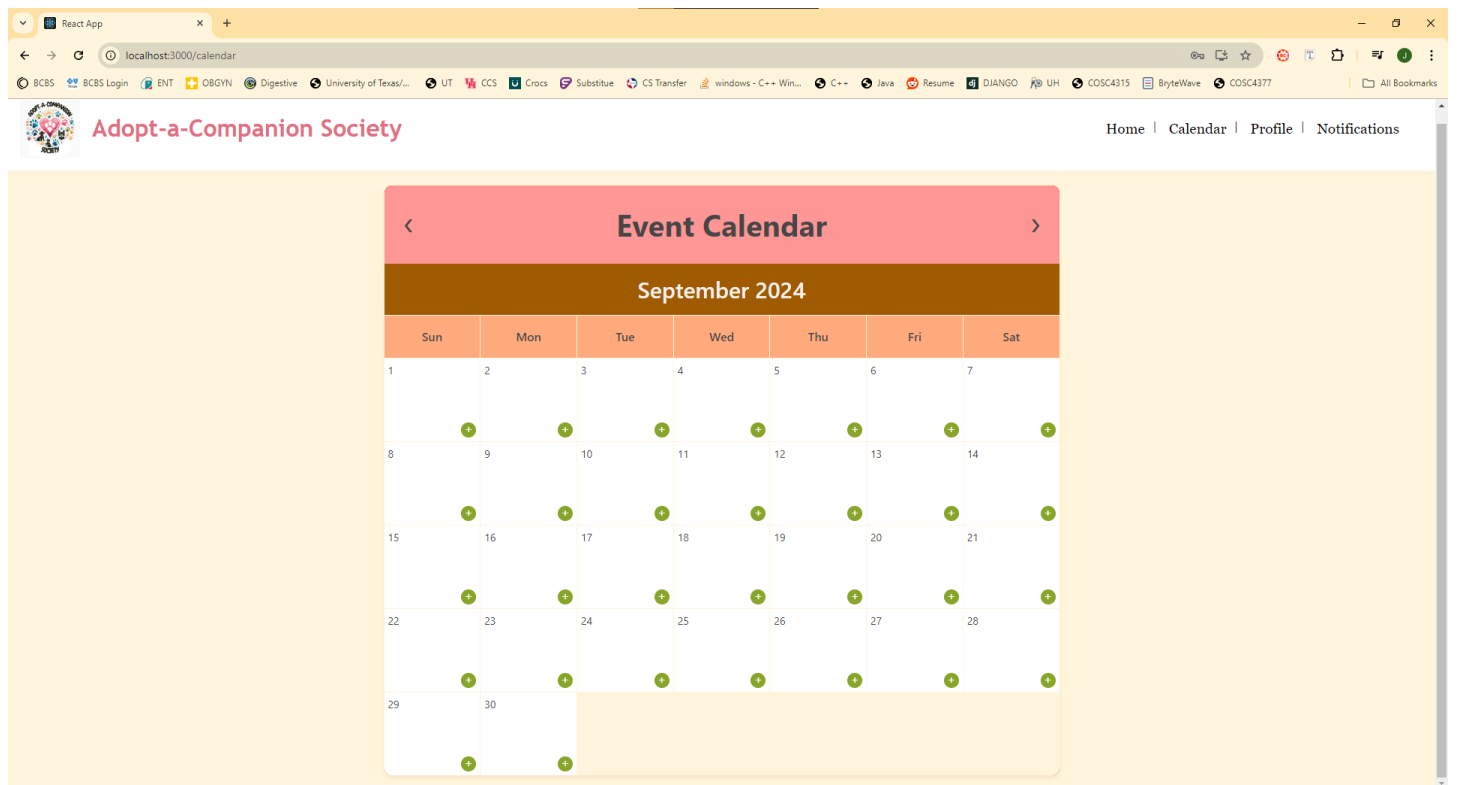

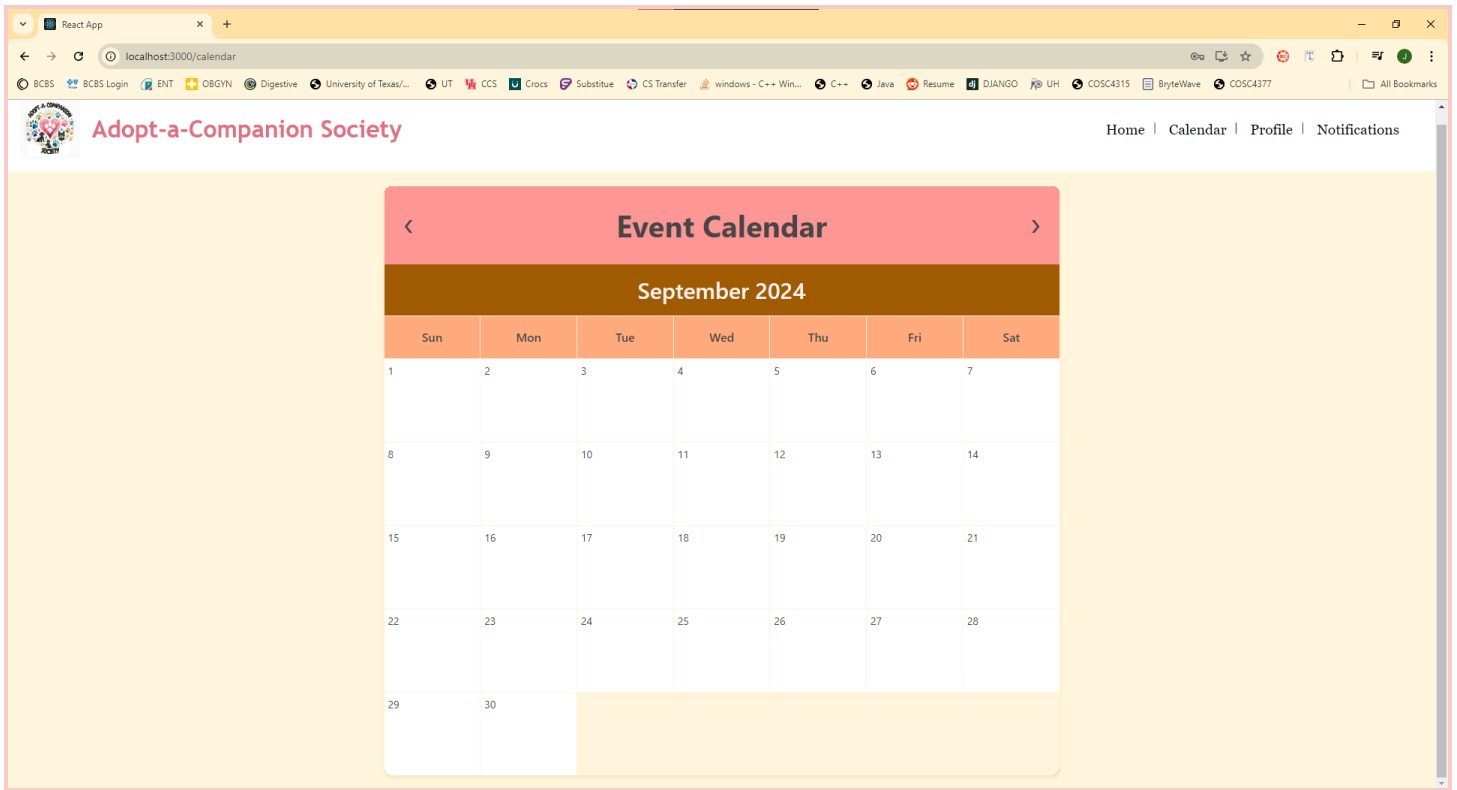

Image: Volunteer Login - Taskbar Update

Description: How the taskbar updates when a volunteer user logs in - only the 'Profile' dropdown menu options will change, allowing users to manage their profile, view theirs (and others) volunteer history), and to 'Log Out'. Volunteer users will also be able to click on 'Notifications' and will be authorized to be directed to the 'Notifications' page. When users click 'Log Out', they will be logged out and directed back to the homepage.

Image: Admin Login - Taskbar Update

Description: How the taskbar updates when an admin user logs in. It's similarly like what a volunteer user has, but has an additional 'Event' option in the taskbar with a dropdown menu consisting of 'Event Management' (create and manage events) and 'Volunteer Event Match' (match a volunteer to an event).

Image: Calendar

Description:

- TOP: What non-logged in and volunteer users see.
- BOTTOM: What admin users see = they can create new events to display on the calendar

Image: Volunteer Login

Description: For regular Volunteer users, they will log in using the regular login page labeled 'Volunteer Login'. If the user is not registered yet, they can click the 'Sign Up' options. If the user is actually an admin, they can click on 'Admin? Click here'. We added a 'Use Demo User' button to test how the pages will update when a user logs in.

Image: Admin Login

Description: For admin users, they will log in using the 'Admin Login' page. If the user is not actually an admin, they can go back to the 'Volunteer Login' page by clicking the 'Back to User Login' link. We added a 'Use Demo Admin Credentials' to test how the pages will update if an admin logs in.

Image: Volunteer Login - User Dashboard (Manage Profile)

Description: When volunteer users click on 'Manage Profile', they will be directed to view their dashboard. Their dashboard consists of information from their form that they filled out when they registered an account. Users can edit their information by clicking on 'Edit Profile' (Note: editing profile is not enabled yet since we are waiting for the backend to be set up. This is for display purposes as of now.)
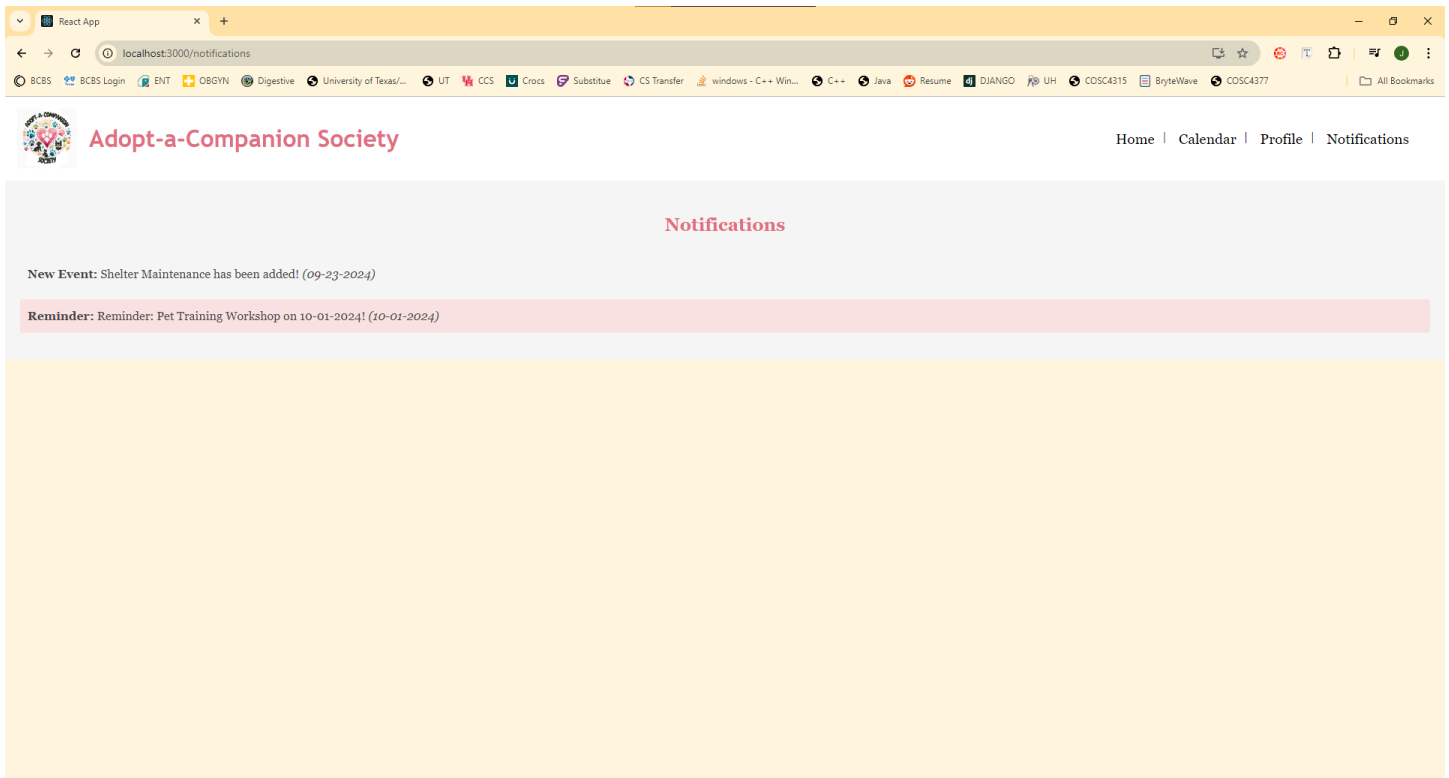

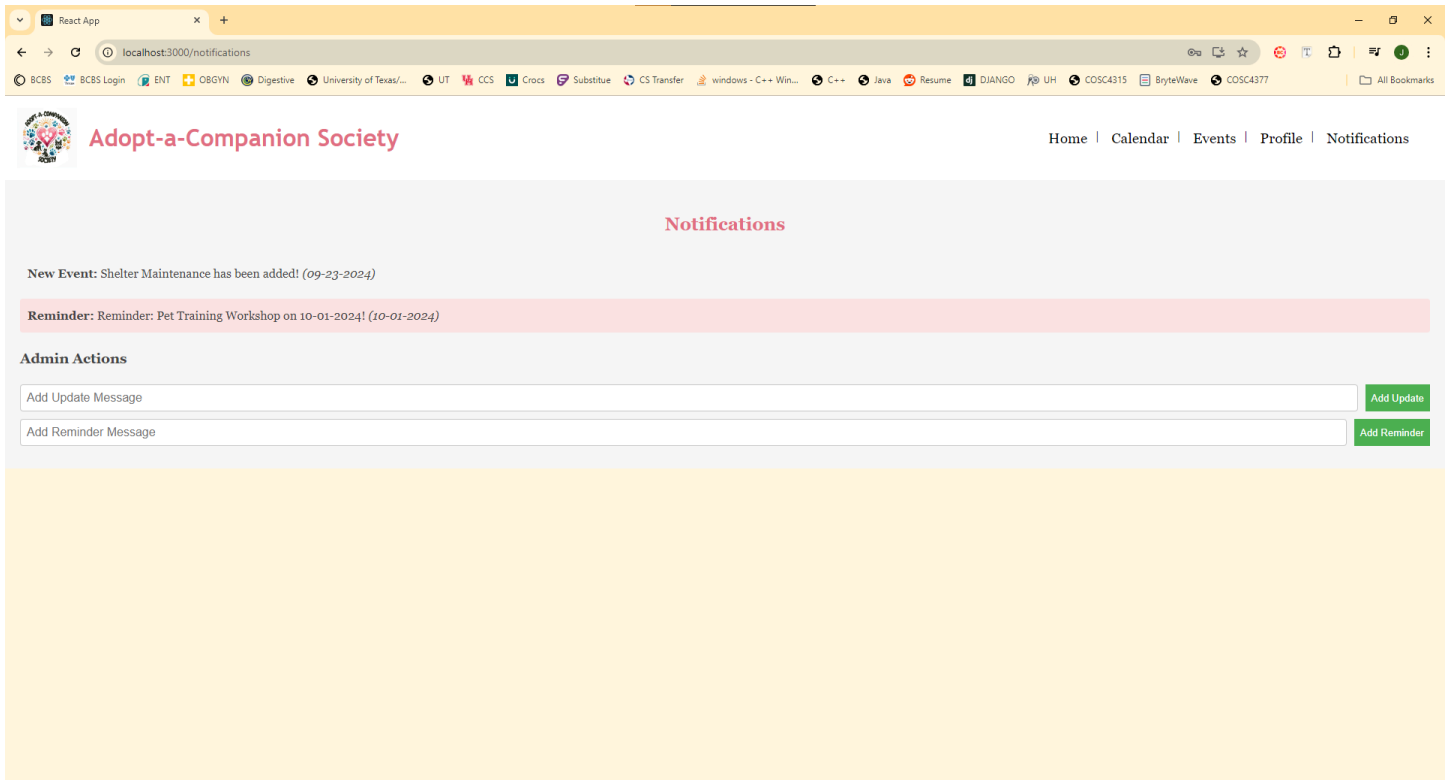

Image: Volunteer Participation History

Description: In this page, users, whether admin or volunteer, can view anyone volunteer's history, including theirs. In this tabular display, it shows the details stemming from the event creation, and that volunteer's participation status for that event.

Notifications

New Event: Shelter Maintenance has been added! *(09-23-2024)*

**Reminder:** Reminder: Pet Training Workshop on 10-01-2024! *(10-01-2024)*

Description:

- TOP: What admin users see. They are able to view notifications posted AND create new notifications. For a new event creation, it will be automatically added. The 'Admin Actions' are where the admins can decide what type of notification they want to send to users and then type it up in the textbox.

- BOTTOM: What volunteer users see. They can only view notifications posted.
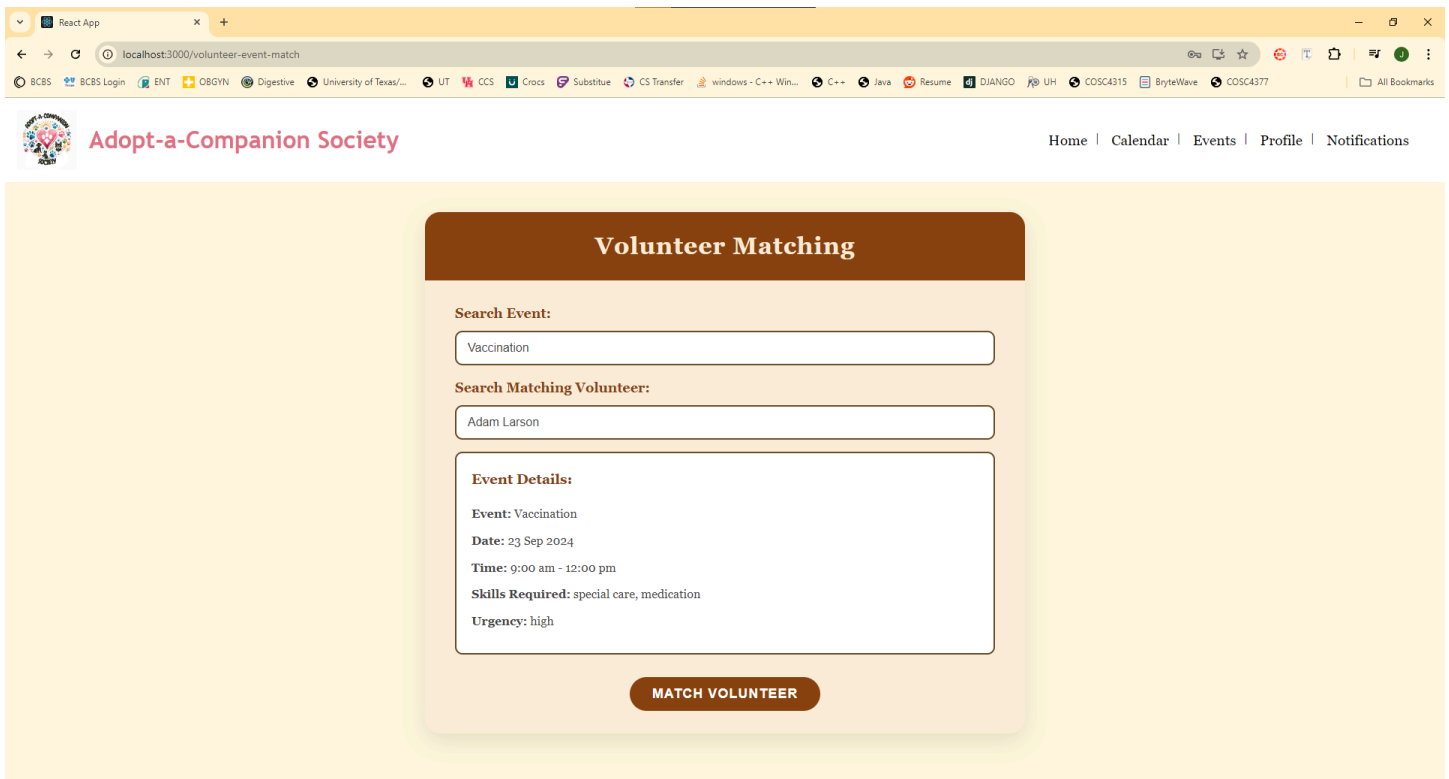

Image: Event Management

Description: Admin users can create new events in the 'Event Management Form'.

Image: Volunteer Matching

Description: Only admin users will be able to match a volunteer to an event using the form above.
